# [GUI] Ćwiczenia VI:

```java
class Test {

    public static void main(String[] args) {
        Product p1 = Product.getInstance(), p2 = Product.getInstance();

        System.out.println(p1);
        System.out.println(p2);
    }
}
```

```java
class Product {

    private static Product instance = null;

    private String name;

    private Product(String name) {
        this.name = name;
    }

    public static Product getInstance() {
        if (instance == null)
            instance = new Product("ProductName");

        return instance;
    }
    /*
    @Override
    public String toString() {
        return name;
    }
    */
}
```
